My work mainly consists of wall-based constructions using wood and mixed media. The pieces often incorporate objects or fragments of objects that have fulfilled a previous function. Recent series of work are *Walking the Land* which relates to walking and journeying with the use of cartography whilst the other series incorporates musical scores and sections of musical instruments.

Lightweight low relief constructions that consist of three pieces approximately 40h x 30w x 6d cm. attached to wall by mirror plates and the space needs to reflect that.
