Using a studio space with a traditional film plate camera in combination with methodical image capture is conducive to reflective thinking.

Slow and careful looking allows for meditation on nature and its forms and functions, granting time to seek out connections, and to explore microscopic worlds. The resulting photographs enable engagement by sharing an intimate, hidden and natural world made available by mechanical means.

Image 1

Hollyhock Leaf 20" x 24". Captured using plate camera, individual prints developed in dark room onto 250gsm photographic paper.

Image 2

Cosmos Bud 20 x 24" . Captured using plate camera, individual prints developed in dark room onto 250gsm photographic paper.
